Level 2 Coding Mini Website Brief

Mini Website
Project Brief

Your task is to create a 1-page website using the guide on the following page to help you.
You will make sure that your version of the website matches the image on the following page as close as possible.
The images will be provided to you as will the colours you need to use.
You will have to obtain the correct font using **fonts.google.com**

Colours

1C1C1C	F5B32F	FFFFFF
Eerie Black	Honey Yellow	White

Mini Website Project Brief

Website element	Annotation
Home | Courses | Contact	← Navbar will contain empty links
{ CodeClub }	← <h1> header
(laptop image)	← image1.jpg (found in folder)
At CodeClub we have a selection of coding courses to help you begin your journey in tech. Completing our courses allows you to earn certificates, which you can add to your CV's to help you land your first tech job!	← <p> paragraph
What we teach	← <h2> header
HTML5 / CSS3 / JS logos	← image2.png, image3.png, image4.png (found in folder)
Our focus is in web development, and here at CodeClub we will help you to learn HTML, CSS and JavaScript. You will learn from the basics and work your way up to intermediate and expert levels.	← <p> paragraph
Where can I study?	← <h2> header
(person studying image)	← image5.jpg (found in folder)
All of our courses are online, meaning you can work from: home, the coffee shop, the office, or anywhere else that you are comfortable. Our courses are also fluid, allowing you to study around your day-to-day life activities.	← <p> paragraph
Reviews	← <h2> header
"Discovering CodeClub helped to give me the confidence to start learning coding. I was able to study around looking after my children and working my part-time job. I'm so grateful for this service!"	← image6.jpg (found in folder) next to a <q> quote
"I have always wanted to learn how to code, but I never knew where to start. CodeClub allowed me to study at my own pace, create projects to add to my portfolio and earn certificates to add onto my CV. Thanks to CodeClub, I earned my first job within tech!"	← image7.jpg (found in folder) next to a <q> quote
Facebook | Twitter | Instagram	← Footer will contain empty links

Mini Website Project Brief

What is an empty link?

An empty link is a link that takes the user nowhere.
They are only typically used when the developer is building the website to make sure it looks as intended, they would never be used in the final build.

```
<a href="#">Home</a>
```

The # will not take the user anywhere, it allows you to create a temporary link for your page.

Mini Website Project Brief

What font do I need to use?

You will be using the font Roboto as it is clear to read and available to obtain via **fonts.google.com**

Roboto   12 styles
Christian Robertson

Whereas recognition
of the inherent dignity

If you are having trouble with adding the font into your code, please ask your tutor to show you.
